

REMARKS

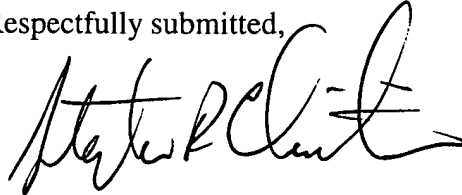

Entry of the above amendment to correct an accidental omission in the Brief Description of the Drawings of the Specification is respectfully solicited. Entry of the above amendment to Brief Description of the Drawings, and subsequent renumbering of the remaining paragraphs of the Specification will not constitute the entry of new matter because at least paragraph 62 and FIG. 6 of the application as filed support such amendment. This Amendment was submitted in response to the disapproval of the Amendment dated January 24, 2005, which was submitted prior to or concurrently with the payment of the issue fee and, therefore, no petition or fee is required.

Applicants note that in the previously submitted Amendment dated July 28, 2004 filed in response to the Office Action dated May 3, 2004, Applicants requested that Paragraph 1 of the Specification be amended to reflect the Serial Number 10/074,355 as being the Serial Number for the related Application entitled SYSTEMS AND METHODS FOR COATING CONDUIT INTERIOR SURFACES UTILIZING A THERMAL SPRAY GUN WITH EXTENSION ARM. Therefore, Applicants have not amended Paragraph 1 herein in light of the previously submitted Amendment presumably having been entered by the Office. Thus an amendment to reference the actual Serial Number in Paragraph 1 has not been requested herein.

CONCLUSION

Should the Office determine that additional issues remain which might be resolved by a telephone conference, the Office is respectfully invited to contact Applicants' undersigned attorney.

Respectfully submitted,

Stephen R. Christian
